COMPANY OVERVIEW

A Textile Manufacturing Partner Built on Process.

Surjay Design & Prints is a B2B textile manufacturing company based in Rajasthan, India. The company specializes in fabric dyeing, screen printing, hand printing, and textile finishing for wholesalers, garment manufacturers, and bulk buyers.

Every meter of fabric processed at our facility follows a structured manufacturing workflow — from raw fabric procurement through dyeing, printing, pressing, quality inspection, and packaging — designed to deliver consistent, market-ready output.

OUR JOURNEY

Building a Textile Brand — One Process at a Time.

From a single manufacturing unit in Rajasthan to a structured B2B textile operation serving domestic and future international markets.

Mission • Vision • Values

Mission

To deliver consistent, process-driven textile manufacturing that meets the quality expectations and commercial timelines of B2B buyers across India and international markets.

Vision

To establish Surjay Design & Prints as a nationally and internationally recognized textile manufacturing brand — known for precision, reliability, and manufacturing integrity.

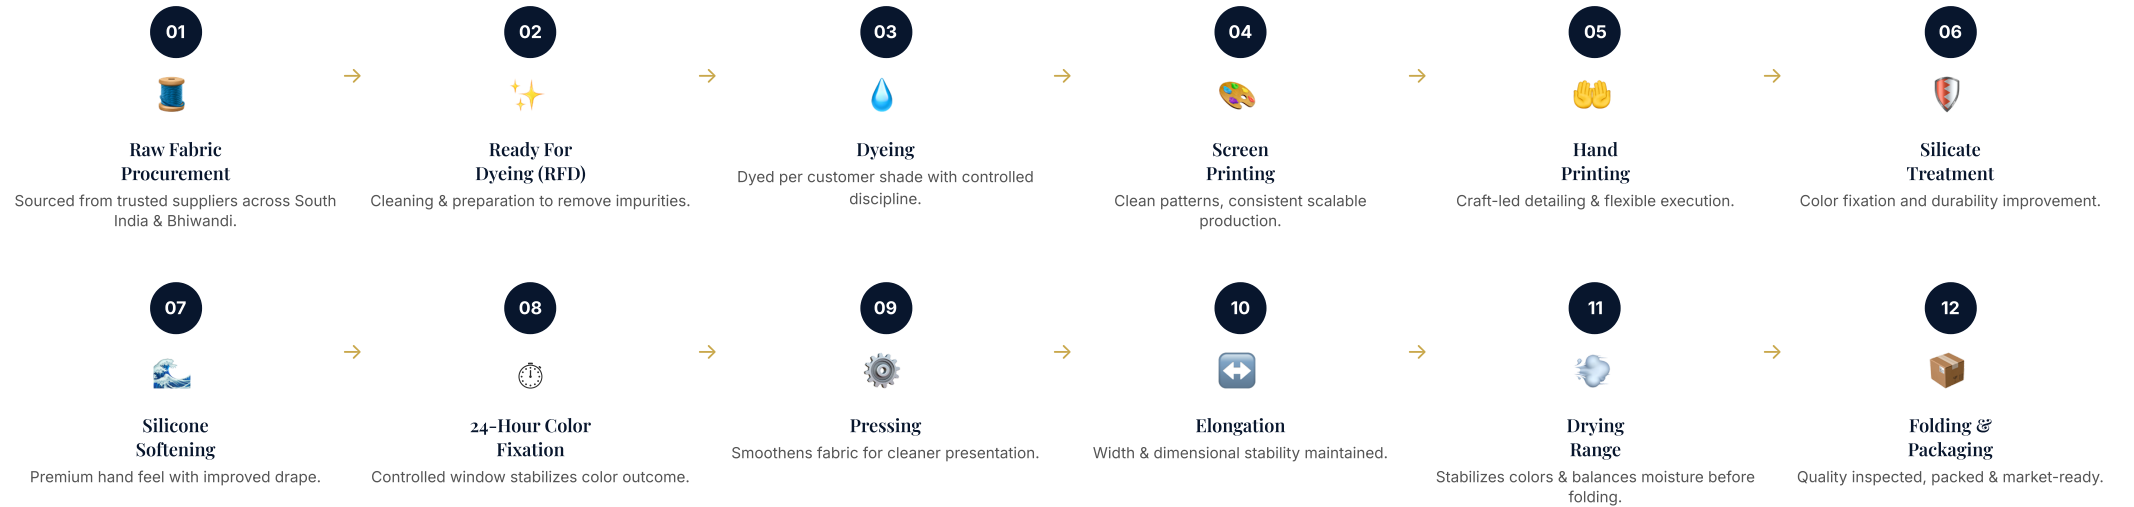

Core Values

- Quality at Every Stage
- Integrity & Transparency
- Manufacturing Craftsmanship
- Innovation & Growth
- Customer Commitment

Our Manufacturing Process

A structured 16-stage workflow engineered for consistency, color accuracy, and commercial reliability at every meter of fabric.

DYEING EXPERTISE

Precision Color. Consistent Results.

Our dyeing process is structured around shade accuracy, color durability, and premium finish quality. Each batch follows a controlled sequence — from color development through fixation, softening, and drying — designed for commercial reliability.

Color Development

Customer shade matching with lab-grade accuracy before bulk processing.

Machine Dyeing

Controlled process discipline for uniform shade consistency across lots.

Silicate & Silicone

Fixation and softening treatments for durability and premium hand feel.

Controlled Drying

Balanced moisture removal that stabilizes color and fabric structure.

● Shade Consistency ● Wash Durability ● Premium Finish

PRINTING EXPERTISE

Screen & Hand Printing. Craft Meets Capability.

Our printing division combines scalable screen printing for commercial repeat orders with traditional hand printing for distinctive textile programs. Both capabilities are supported by experienced craftsmen and organized production scheduling.

Screen Printing

Clean repeat patterns with consistent coverage for bulk commercial orders.

Hand Printing

Craft-led detailing with flexible pattern execution for distinctive programs.

Custom Patterns

Design development support for buyer-specific patterns and colorways.

Natural Colors

Controlled color systems with traditional craftsmanship principles.

PRODUCTION CAPACITY

Organized for consistent output across multiple product categories with flexible scheduling for bulk and custom orders.

An Environment-First Factory, Powered by Zero Liquid Discharge.

Textile dyeing and finishing consume a great deal of water — but at Surjay Design & Prints, none of it leaves the facility as pollution. Our in-house Zero Liquid Discharge (ZLD) plant treats every drop of effluent and converts polluted process water back into clean, natural-grade water that is recycled straight back into production.

Zero Liquid Discharge

No polluted water is ever released outside the facility.

Water Recycling & Reuse

Treated water is cycled back into dyeing and processing.

Multi-Stage Treatment

Effluent is restored to clean, natural-grade quality.

Eco-Responsible Dyeing

A lower footprint that protects local groundwater.

RESPONSIBLE MANUFACTURING

Every metre of fabric we dye and print is processed through a closed-loop water system — delivering premium textiles without compromising the environment around our facility.

Process Discipline at Every Stage.

Quality is not a final check — it is embedded in every stage of our manufacturing process, from raw material selection to packaging.

01

Raw Material Inspection

Every fabric lot is inspected for construction, weight, and suitability before entering the manufacturing process.

02

Color Consistency Testing

Shade matching and uniformity checks are conducted across the batch to maintain visual consistency.

03

Fabric Surface Inspection

Each lot is examined for weaving defects, print registration accuracy, and finish quality.

04

Dimensional Stability

Width, elongation, and shrinkage parameters are monitored during pressing and finishing.

05

Packing Standards

Final folding, packaging and labelling follow standard procedures for market-ready dispatch.

✓

Quality Commitment

Our manufacturing process is designed to ensure consistency, quality, and reliability at every stage of production.

A Manufacturing Mindset Built Around Buyer Confidence.

Premium Manufacturing

Structured process from procurement to packaging.

Skilled Workforce

Experienced team across dyeing, printing, and finishing.

Quality Assurance

Multi-stage inspection from raw fabric to final output.

Modern Infrastructure

Organized facility with dedicated process zones.

Custom Solutions

Buyer-led programs with flexible processing capability.

Reliable Delivery

Organized dispatch schedules and process transparency.

Scalable Production

Capacity built for commercial volume requirements.

Transparent Process

Clear communication from order to delivery.

Industries We Serve.

Our manufacturing capabilities serve a diverse range of B2B buyers across the textile value chain.

Fashion Brands

Fabric for seasonal collections and design programs.

Garment Manufacturers

Processed fabric ready for garment production lines.

Wholesalers

Bulk fabric supply for regional distribution networks.

Retail Chains

Private label programs and custom fabric supply.

Uniform Suppliers

Consistent fabric for institutional and corporate uniforms.

Home Furnishing

Fabric for curtains, upholstery, and home décor.

Export Houses

Export-quality processing for international buyers.

Textile Traders

Bulk inventory for regional textile markets.

FUTURE VISION

Our Vision for Tomorrow.

Surjay Design & Prints is building toward a future defined by expanded capability, wider market reach, and technology-enabled manufacturing.

National Expansion

Expanding distribution across major textile markets in India.

International Markets

Building export readiness for global B2B textile buyers.

Digital Transformation

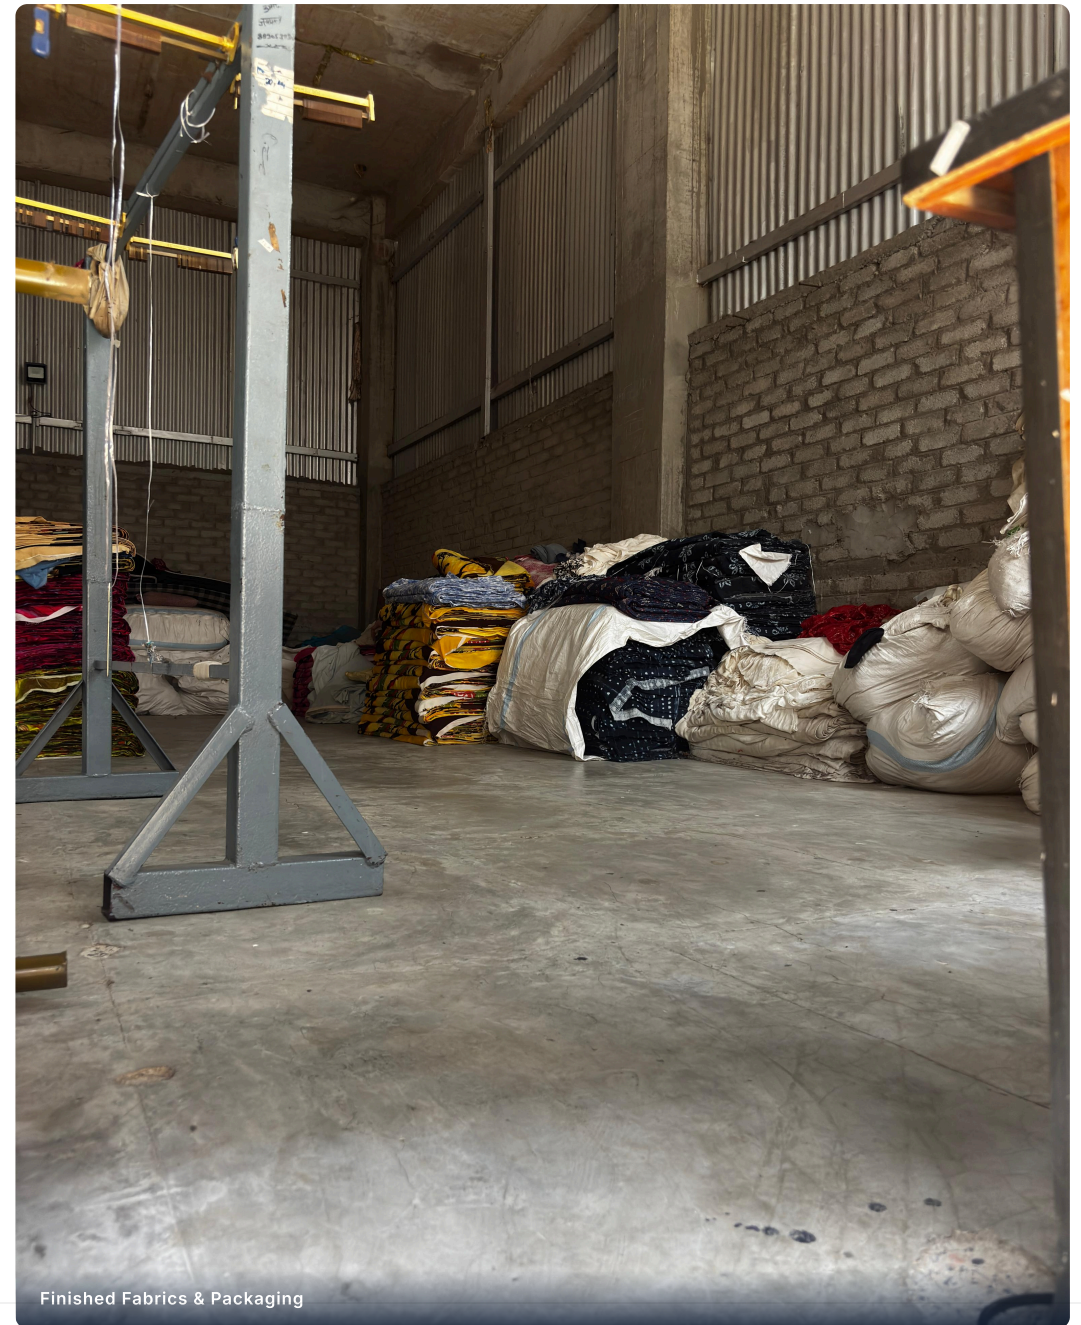

Implementing technology across manufacturing, quality, and communication.

Sustainable Growth

Responsible manufacturing practices with long-term environmental awareness.
